

CALL FOR TENDERS

WEB DEVELOPERS – INTERACTIVE MIGRANTS RIGHTS MAP

I. INTRODUCTION

[SOLIDAR](#) is a European network of Civil Society Organisations (CSOs) with a global reach working to advance social justice through a just transition in Europe and worldwide. Since 2019, SOLIDAR has monitored the implementation of the European Pillar of Social Rights (EPSR) at national level through our [Social Rights Monitor \(SRM\)](#). Within the SRM, SOLIDAR also monitors how the social rights of migrants, refugees and asylum seekers are impacted by EU and national policies. However, in a context where migration policies have become a central priority on the EU agenda, SOLIDAR and its members identify a pressing need for a standalone monitoring tool focusing specifically on migrants' rights across Europe, complementary to the SRM – the Migrants Rights Monitor (MRM).

In order to visually represent the results of the Migrants Rights Monitor work done by the network, SOLIDAR is looking for a web developer/designer that can create an interactive web map, following the steps of the Social Rights Monitor, which allows to visualise the data gathered on the state of migrants' rights in many European countries.

II. DESCRIPTION OF THE WORK

SOLIDAR is currently in the process of developing the methodology of the Migrants Rights Monitor, which will be ready by the first week of October 2026 and will be used as a basis for the creation of a dataset (mainly qualitative data) that will feed into the Migrants Rights Map. This map will be embedded in or linked to SOLIDAR's website and will present the results of the Migrants Rights Monitor in an innovative and engaging way. SOLIDAR will regularly update the map by feeding it with new data at least once every two years. Therefore, SOLIDAR is looking for a web developer who creates a web map that:

- Is interactive and allows the user to access the analysis of migrants' rights in each of the concerned countries.
- Is visually appealing and presents several features for user engagement. To this end, the creativity and ability to come up with innovative proposals of the designer will be pivotal.
- Reflects the new methodology of Migrants Rights Monitor by enabling the user to access a more narrative part (e.g. factsheets) as well as some infographics about the selected country.

- Creation of the MRM logo which must be inspired by SRM logo.
- Presents data and information in a meaningful and impactful manner.
- Allows SOLIDAR to feed it with new data at least once every two years.
- Is easy to edit and manage also for non-experts (SOLIDAR).
- Can be replicated in order to have multiple versions in different languages.
- Is embedded in SOLIDAR's website taking into account the features of our website (the creation of a separate webpage/website is a possibility)
- Is accessible also from mobile phones.

Prior to beginning the work on the map, the web developer/s should run an assessment of SOLIDAR's website to make sure it is compatible with the embedding of the map.

III. APPLICATION PROCESS:

Applications need to be submitted electronically to Alba Gonzalez (alba.gonzalez@solidar.org) and Ludovico Caminati (Ludovico.caminati@solidar.org) by October 14.

The proposal should consist of two parts:

- a) **The technical and creative part:** The concept for implementing the above assignment alongside the technical expertise, experience, proof for similar assignments handled in the past and other relevant details as a part of technical and creative bid.
- b) **The financial part:** breakdown of costs (i.e. software, labour, rounds of feedback and edits, etc).

IV. BUDGET AVAILABLE

SOLIDAR will provide financial support of a maximum amount of **EUR 5 000 VAT included**.

V. TERMS AND CONDITIONS

The payment shall be made in two instalments:

- 30% of the total financial support paid after the cooperation agreement between the consultant(s) and SOLIDAR is signed.
- 70% of the total financial support paid after the submission of the final output approved by SOLIDAR team.

VI. CRITERIA FOR SELECTION OF THE PROPOSAL AND THE WEBDESIGNER:

Web development

- Web designing/developing skills and creative design.
- Similar assignments carried out in the past.
- Previous collaborations with (progressive) CSOs will be an asset.
- Professional knowledge of English.

Proposal

1. Overview

- The proposal is adequate and clearly articulated.
- The objectives of the call are clearly addressed by the proposal.
- Originality and innovativeness of the proposal.

2. Value for money
